OpenAthens Authentication

A natural fit for ALMA Libraries

STUDENT BENEFITS

- Single sign-on, one username and password, for all resources
- Move between resources without reauthentication
- Enables personalized research experience

ADMINISTRATOR BENEFITS

- Administrator dashboard is visual and intuitive
- Manage SAML and IP proxy with one tool
- Flexible hierarchy options for easy management and reporting
- Experienced EBSCO implementation and maintenance through the life of subscription
- 24/7/365 EBSCO service and training resources
- Active Listserv and annual conferences provide peer-to-peer sharing of techniques and ideas

IT BENEFITS

- Secure integration with campus-wide user directory enables easy compliance with internal and external data protection regulations
- OpenAthens makes configuring resources easier and less time-consuming

LEARN MORE:

www.ebsco.com/openathens

FEATURES:

Flexible

SAML SSO authentication for most resources plus proxy IP for providers who don't yet support SAML

Analytics

Visual usage reporting module

Customizable

Add custom user groups and attributes to make reports more meaningful

Support

Manage walk in users with ease

Security Assertion Markup Language (SAML) securely facilitates the information providing researchers access to the resources they rely on with as personal - or anonymized - a user experience as desired. In an era where safe, customized access to research materials is the expectation, SAML-based single sign-on remains the standard.
